

COMPANION NOTE TO THE DOCUMENT PREPARED FOR THE NCCP

A consultation document was tabled in the National Assembly in June 2015 by the Minister of Justice pursuant to article 783 of the Act to establish the new Code of Civil Procedure (S.Q., 2014, c. 1). Its purpose was to explain the nature and scope of the updating operations made necessary by the replacement of concepts predating the new Code of Civil Procedure (NCCP). A number of interested parties subsequently commented on the document, resulting in modifications to the proposed amendments to the French and English versions of the statutes and regulations.

The document listing the necessary replacements authorized by article 783 of chapter 1 of the statutes of 2014 may now be viewed on the Publications du Québec website. Interested persons will be able to familiarize themselves with all the amendments to be made to the statutes and regulations by the Service de refonte.

Viewers are cautioned, however, that the document will for a certain time remain a work in progress.

The Service de refonte at the Ministère de la Justice will be integrating the amendments into the statutes and regulations during the month of February and is to have completed the process in time for the updating to 1 March 2016.
